Announcing JM DEXcell® FA VSH Glass Mat Roof Board

Johns Manville is excited to announce a new coverboard for FM Very Severe Hail (VSH) requirements. **DEXcell FA VSH™ Glass Mat Roof Board** is now available as an approved option with JM roof systems.

DEXcell FA VSH™ Glass Mat Roof Board is a reinforced gypsum panel with an enhanced moisture-resistant gypsum core and heavy-duty coated glass mat facers. It is an excellent choice for applications requiring maximum hail and puncture resistance. Extremely durable and approved for use in single ply and multi-ply assemblies meeting FM Very Severe Hail (VSH) classification.

JM DEXcell FA VSH™ Glass Mat Roof Board meets FM 'VSH' with fully adhered JM 80 mil (smooth back) TPO membrane and standard JM TPO membrane adhesives, 4x4' DEXcell FA VSH™ boards adhered in JM Roofing System Urethane Adhesive (RSUA) ribbons, 12" OC min. JM TPO FB 115 or FB 135 membranes can be adhered with JM Two-Part UIA in a splatter application, DEXcell FA VSH™ may be mechanically fastened or adhered with JM RSUA in ribbons, 12" OC min.

Product Description	Size	Part Number
DEXcell FA VSH Glass Mat Roof Board 5/8"	4' x 4' (1.22 m x 1.22 m)	70008750
DEXcell FA VSH Glass Mat Roof Board 5/8"	4' x 8' (1.22 m x 2.44 m)	70008751

Please visit www.jm.com and www.roofnav.com for more information about FM Very Severe Hail (VSH) rated systems available from Johns Manville.

Thank you for your continued business and support of JM products.
